Section number 7 Page 1

Description:

The Poteau Work Center Residence #2 is located east of Waldron just south of Arkansas Highway 80. Located on the work center grounds is a single story structure of frame construction with a rectangular plan and a gable roof. The structure rests upon a continuous stone foundation, its walls are covered with novelty siding, and the roof is covered with asphalt shingles. The northern elevation of the house has two sets of six-over-six pane, double hung windows which are covered by metal awnings. The house has one bay central front porch consisting of a set of stone steps and a series of three columns on the front corners of the porch at the crest of the stairs. These columns support a classical pediment with returns which is covered by a gabled roof that intersects midway up the front half of the gabled roof of the main structure. The western elevation of the house is a covered garage which was added to the house. The northern end of this garage is a small utility/storage shed. The southern elevation shows a screened porch attached to a rear "L", both of which are covered with a shed type roof which slopes to the south. Inside the screened porch is a single door with a single six-over-six window to its side. The rear "L" has one six-over-six window which is covered by a metal awning. The eastern view shows a gabled side projection as well as the side of the rear "L". The rear "L" has another six-over-six window with a metal awning cover and the side projection has a pair of six-over-six windows. This view also shows a single six-over-six window on the main structure. The structure has an interior chimney made of brick which has a placement to the eastern side of center on the southern side of the gabled roof. The building is in excellent condition.

National Register of Historic Places Continuation Sheet

Section number 8 Page 1

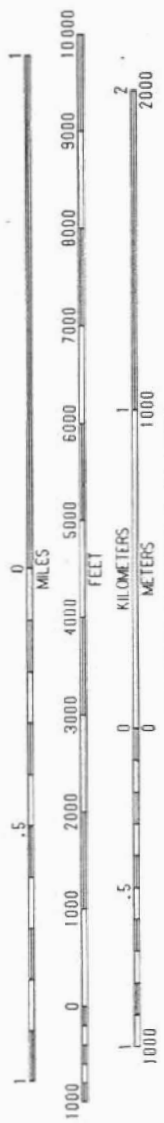

The Poteau Work Center Residence #2 was constructed circa 1939 by members of the 1707th Company of the Arkansas CCC District stationed at the Waldron Camp that was located approximately fourteen miles to the east. It was constructed as the residence for the ranger of the Poteau Ranger District of the Ouachita National Forest (ONF). This building, along with the associated work center building (nominated separately), constituted the district headquarters for this sizeable district that extends westward from Arkansas into Oklahoma, and it continues to serve that purpose today. It is significant for its associations with the significant contributions to American social history made by the Civilian Conservation Corps and for its associations with the conservation movement that President Roosevelt intended this organization to serve, particularly within such protected federal lands as the national forests.
